Getting started with ShinobiCharts Trial

1. Create a new project / open a current project in xCode

2. Add the ShinobiCharts framework ShinobiCharts.framework, using either:
   2.1. Drag and drop the file into the project tree
   2.2. Select the Build Phases tab for the project target and use the + to add the framework (Add Other...)

3. Add the required iOS libraries:
   3.1. QuartzCore
   3.2. OpenGLES
   3.3. CoreGraphics
   3.4. Security

4. Import the chart header file in the required source code #import <ShinobiCharts/ShinobiChart.h>

5. Set a license key for the chart object - using the trial license emailed to you.

6. Take a look at the sample projects bundled with the beta, in the Samples folder (You will also need to set your trial license key on these charts):
   6.1. LineChart
   6.2. ColumnChart
   6.3. BarChart
   6.4. PieChart
   6.5. LargeDataSet
   6.6. FinancialCharts
   6.7. LogChart

7. Reference documents are available in HTML, use index.html in the docs folder of the distributed zip file.
